## 10. Precautions for use

- 1) A battery shall not be stored at temperatures in excess of 45°C. Storage at less than 30°C is recommended. Storage at less than -40°C can deform the plastic parts and may cause a leakage. To prevent self-discharge caused by corrosion, or decrease of insulation, humidity during storage shall be less than 70%.
- 2) The battery has an explosion resistant construction. But the following cautions should be taken, because combustible materials such as lithium metal and organic electrolyte are contained in the battery.
  - \* Do not use except in applicable model or equipment.
  - \* Do not connect more than three cells in series.
  - \* Do not mix different types (chemistries) of batteries.
  - \* Do not short circuit.
  - \* Do not dispose in fire.
  - \* Do not charge.
  - \* Do not disassemble.
  - \* Do not connect the wrong polarity (+, -)
- 3) Keep away from heat source of flame.
- 4) The battery shall not be washed by ultrasonic wave washer.
